Report of strike (5th January, 2022) in Steel industry.

We have observed one day strike today ,5th January 2022 in SAIL and RINL against the anti-worker MoU signed on 22nd October 2021. In fact Government and Management have planned to impose the settlement of 10 years with a quantum which is less than the benefit achieved in the five years agreement . we have campaigned throughout the industry to protect our rights of Gratuity, arrears and other benefits . Contactor workers are deprived of proper wage and safety ; though they have become part and parcel of production procedure everywhere . We decided to register our objection through strike so that it can reach to the government through labour department.

We called the strike alone against the authoritarian attitude and obstinate stand of management. We have already got moral support to scrap the black MoU from every worker during our campaign. Strike is partial. We alone are fighting to change the black MoU . Our fight against discrimination, deprivation, unilateralism and well planned suppression of wage level will continue .

Comradely ours,

(Lalitmohan Misra)
General Secretary
